

USDT TRC-20 Token Whitepaper

1. Introduction

USDT TRC-20 is a stablecoin token deployed on the TRON blockchain. It is designed to provide fast, secure, and low-fee transactions for users while maintaining transparency and full control over token management. This token is suitable for payments, transfers, trading, staking, and various decentralized finance (DeFi) applications.

2. Token Details

- Name: USDT
- Symbol: USDT
- Decimals: 6
- Total Supply: 25,000,000
- Contract Address: THmFw1MGiNKJD4wytf5t4emFEqj3JWXxVw
- Network: TRON (TRC-20)

3. Features

- Transfer Fee: A configurable transfer fee of up to 10% can be applied.
- Whitelist Functionality: Owner can define a whitelist for controlled token transfers.
- Mint & Burn Functions: Owner can mint new tokens or burn existing tokens to adjust supply.
- Full Ownership Control: Owner can manage fee recipient, whitelist, and token supply safely.

4. Use Cases

1. Payments: Quick TRC-20 transactions for merchants or individuals.
2. Transfers: Fast peer-to-peer transfers with minimal fees.
3. Trading: Compatible with exchanges and wallets supporting TRC-20.
4. DeFi Applications: Staking, liquidity pools, and other decentralized finance tools.

5. Roadmap

- Q1 2025: Contract deployment and verification on TronScan.
- Q2 2025: Listing on wallets like Trust Wallet and TronLink.
- Q3 2025: Community building via Telegram and X/Twitter.
- Q4 2025: Explore integrations with DeFi platforms and exchanges.

6. Contact

- Telegram: https://t.me/USDT_tronscan
- X / Twitter: @trc20offic94312

7. Disclaimer

USDT TRC-20 is a digital token on the TRON network. Users are responsible for securing their wallets and private keys. This token is for informational and transactional purposes only and does not constitute financial advice.
